# The US Rosacea Market: Coverage

## Scope of the Report

Attributes	Details
Title	The US Rosacea Market: Size, Trends & Forecasts (2018-2022)
Coverage	The US
Forecast Period of Market	2018-2022
Competition in the Market	Market is dominated by top players, together constitute more than half of the market share.
Key Players	Foamix Pharmaceuticals Ltd., Bayer Group, Galderma, Valeant Pharmaceuticals International

# The US Rosacea Market

## Executive Summary

Rosacea is a common chronic condition of the skin with a high prevalence rate among the US population. It is observed that it naturally begins at any time after the age of 30 and more and mostly affect the area of nose, cheeks and forehead. In some cases, rosacea may also occur on the neck, chest, scalp or ears. Rosacea symptoms and signs include facial flushing, fine red vascular lines, swollen, red eyelids and many more. The disease is more common in women and those who have fair skin. The cause of such skin condition is still unknown and cannot be cured. The only way to control rosacea is by minimizing its symptoms.

The US rosacea market has grown over the past few years and is anticipated to grow during the forecasted period also i.e. 2018-2022 at a high growth rate on the back of rising incidence rate of the disease among the US population.

The growth in the market will be driven by aging population, unhealthy eating habits and environmental factors, rising disposable income and entry of new drugs and treatments in the market. Yet the market growth is restrained by factors such as lack of awareness and knowledge and stringent government regulations for the approval of new drugs.
