Global Vaginal Laxity Market: Coverage

Scope of the Report

Attributes	Details
Title	Global Vaginal Laxity Market: Size, Trends & Forecasts (2018 Edition)
Coverage	Global & Regional
Forecast Period of Market	2018-2022
Competition in the Market	Highly competitive due to the presence of large number of players.
Key Players	Viveve Medical, Inc., Almirall, Hologic, Inc., Fotona .

Global Vaginal Laxity Market

Executive Summary

Vaginal laxity is a term used to describe the looseness of the vagina's entrance, or introitus and is one of the most common intimate issues faced by women. Laxity primarily resulted from trauma to the pelvic musculature and vagina, during pregnancy and vaginal childbirth. Ageing, childbirth and certain medical conditions affect collagen levels in the skin and vaginal tissue, creating a feeling of looseness. Vaginal laxity is one of the most common yet overlooked health concerns among women because they feel embarrassed to discuss it with doctors or considered it as a normal part of ageing. Vaginal laxity can lead to a negative impact on female sexual function, body image, and quality of life.

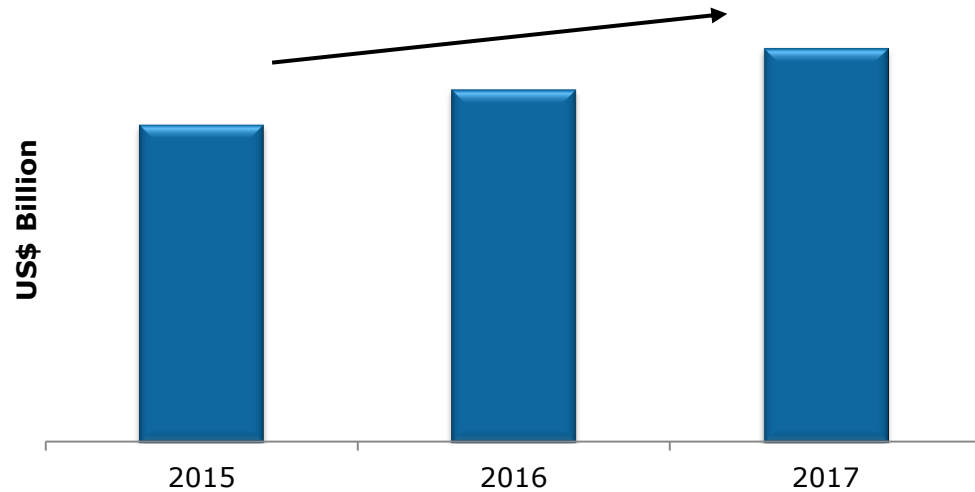

A wide number of treatments are available for vaginal laxity, which help women to regain their shape post child birth. Some of the popular treatments for vaginal laxity are: kegel exercise, vaginal cones, tightening creams, vagina rejuvenation and reconstructive surgery.

The global vaginal laxity market has shown rising trends over the past few years and is anticipated to grow at a significant growth rate over the forecasted period i.e. 2018 to 2022. Drivers that are and would support the growth of the market are multiple deliveries through vaginal canal, hormonal changes in women, intraoperative use of forceps, etc.

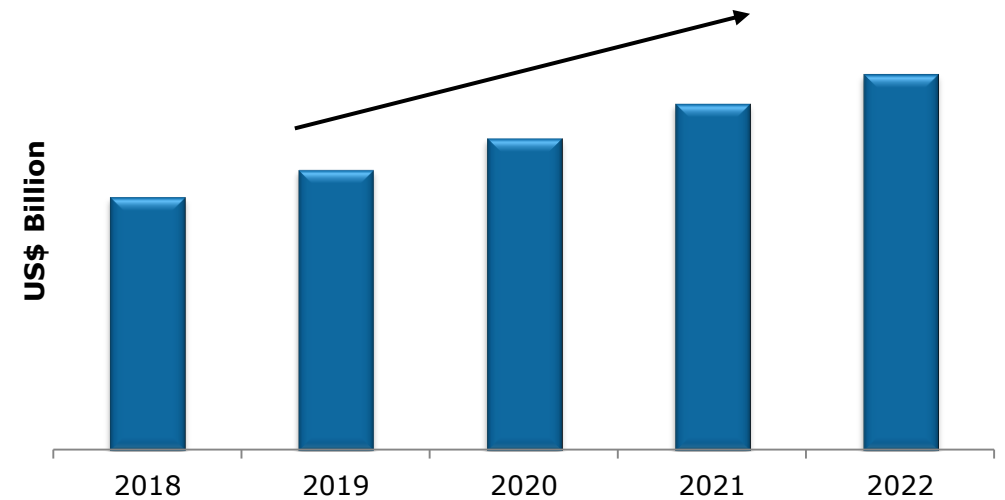

The market is expected to grow on the back of launch of energy-based devices, emergence of genital aesthetics, technological advancements, etc. in the near future. However, the market is facing some challenges such as side-effects associated with vaginal tightening surgery, high cost of treatment, lack of awareness among women, etc.
