The US Car Wash Equipment Market

Executive Summary

In old days, generally people use to clean their cars in the back-yards of their home or other convenient places and later, in-hand car washes came into existence. In this technological era, car washing industry is also not far behind and is influenced by the same. Nowadays, mechanical devices in designated areas mostly perform this job. The car wash industry is divided into two broad categories namely car wash equipments and car wash services. Car wash equipment market is dependent on the car service market and vice-versa.

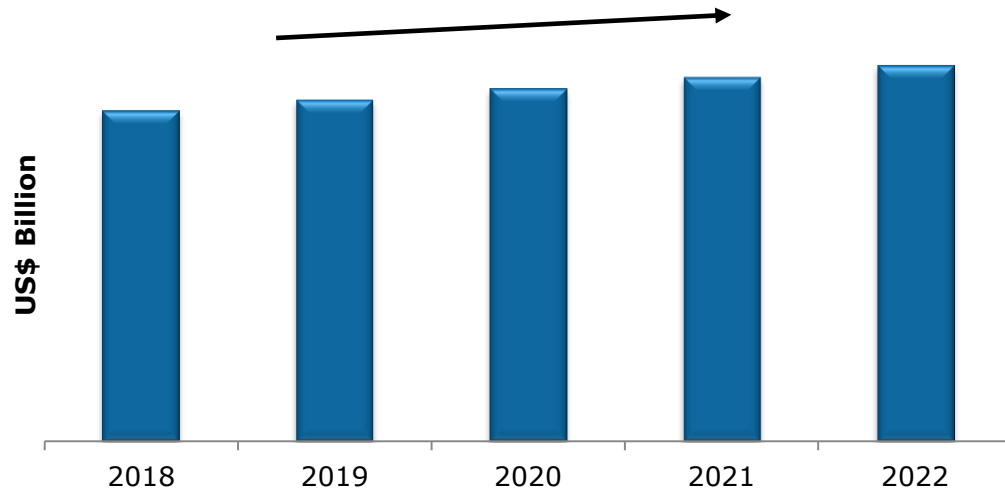

Car wash equipment market consists of production and distribution of wide variety of car wash equipments by the manufacturers. Some of the popular car wash equipments include Air Car Wash Systems; Water Car Wash Systems, Vacuums, Detailing Stations, Pump Stations etc. Car washes can be self-serve, fully automated, or full-service with attendants who wash the vehicle.

The US car wash equipment market has shown rising trends over the past few years and is anticipated to grow at significant growth rate over the forecasted period (2018-2022) also. Growth in the market was primarily driven by rising demand for vehicle detailing and sound growth in vehicle population. Technological advancements allow people to recognize the importance of good car wash which resulted in more people want to ensure their car washes are done in a right way and long lasting. This leads to increasing demand for higher end detailing services.

Other growth drivers such as lower gas prices, rising disposable income of the US population, technological advancements such as touch-free and hybrid washing technology, advanced water recycling systems, economical innovations etc. are expected to propel the demand for car washing equipments in upcoming years. Yet the market is restricted by some challenges such as barrier to new entrants and, increased volume of cars washed at a lower profit margin per vehicle.
